

Hyunseok Choi

Work Experience

Network Engineer & Network Designer — HanTek System

Jan 2023 – Dec 2023 · Korea, Daegu · Team role

- Deployed and maintained server hardware, NAS/SAN storage systems (incl. Western Digital), and network infrastructure across **all Daegu city administrative offices** — City Hall, every district office (gu-cheong), and county office (gun-cheong).
- Configured and troubleshot Cisco routers and switches for public-sector LAN/WAN environments.
- Supported hospitals and private-sector clients with storage procurement (vendor-agnostic), installation, and ongoing maintenance.

Community & Volunteer

Korean Community Manager — Path of Exile (Grinding Gear Games)

2017 – Present · Remote / Volunteer

- Solo volunteer translator for the Korean version of *Path of Exile* (2017–2019) — translated in-game dialogue, skill descriptions, and patch notes.
- Invited by **Kakao Games** as a community contributor when they launched the Korean service.
- Currently co-manages the official Korean **community cafe and Discord server**, moderating and supporting the player base.

Competitive Gaming Achievements

- **Rank 2 worldwide** — Tekken Card Tournament (2013)
- **Professional player** — Hearthstone (June 2014–2017)
- StarCraft I & II Co-op Missions: Level 1000+, 30,000+ games played (2000–Present)

Projects

Lead Developer & Composer — SnT (Speed & Track)

Jan 2025 – Feb 2025 · DigiPen Institute of Technology · Team of 3

- 3D casual racing game built in **Unreal Engine 5** (Blueprint & C++).
- Responsible for core gameplay logic, AI racing opponents, level design, music composition, and SFX integration.
- Published at github.com/ido-013/SnT.

Main Programmer & Composer — WWSC

2025 · DigiPen Institute of Technology

- 2D platformer written from scratch in **C++ with Raylib**.
- Implemented player movement, collision detection, level progression, and composed original soundtrack.

WebGL Graphics Portfolio

2024 – Present · DigiPen Institute of Technology

- Interactive real-time graphics demos: Procedural Mesh Generation, Fog Shading, Toon/Cell Shading, Shadow Mapping, Value Noise, Perlin/Gradient Noise.

Education

Dual Degree — DigiPen Institute of Technology & Keimyung University

Mar 2024 – Present · Daegu, Korea & Redmond, WA, USA

B.S. in Computer Science in Real-Time Interactive Simulation

Relevant Courses: Computer Graphics I & II, Advanced C/C++, Data Structures, Game Implementation Techniques, Operating Systems I, Project I & II, Vector Calculus I & II, Linear Algebra

CCNA Completion — Government-funded Education Center

Jan 2022 – Oct 2022 · Daegu, Korea

High School Diploma — Gyeongsin High School

Feb 2015

Skills

Languages	C++, C, GLSL (Beginner – actively developing)
Engines & APIs	Unreal Engine 5 (Blueprint & C++), OpenGL, WebGL, Raylib
Networking	Cisco Routers & Switches, Network Security, Network Monitoring Platforms, VLANs, LAN/WAN (Experienced)
Infrastructure	Server hardware, NAS/SAN storage systems (WD and others), Linux (RedHat/CentOS) (Experienced)
Tools	Git / GitHub, Visual Studio, GitHub Pages
Languages	Korean (Native), English (Very Good), Japanese (Basic)
